Over the last 10 years, the SiliconPV Conference has established itself as one of the world's top PV conferences where in-depth new scientific insights and reviews on technological excellence in crystalline Si-based PV technology are presented. After the first successful online edition in 2021, the first hybrid conference will take place in 2022, with an on-site gathering at the beautiful Lake Constance in Germany and simultaneously as an online format – allowing everyone to attend!

As in recent years, SiliconPV continues the fruitful cooperation with the nPV Workshop on silicon solar cells using n-type substrates as well as the bifiPV Workshop focusing on bifacial PV technology – giving you the unique opportunity to visit all three events in one!

The conference identity is well established in the PV community and gathers about 350 people from all over the world, mixing students, scientists, technologists, and PV experts from industry. Moreover, the conference is well known as a perfect place to foster innovations in the PV world.

Becoming a sponsor of the SiliconPV Conference and/or the nPV and bifiPV Workshops is a great way to raise your company's visibility and highlight your company's presence as an active and important player in the field of silicon photovoltaics. The event offers several sponsorship opportunities helping you to find the most effective way to connect with our attendees and your target group.

Your benefits

- Maximize your company's visibility through the conference website and the virtual conference tool.
- Take advantage of new ways of networking to show your latest research, innovations and services.
- Profit from the opportunity to communicate with a global audience.
- Develop contacts with ambitious young scientists in the field: the conference will provide an excellent base for your human resources development.

Sponsorship boosts your firm's visibility, builds loyalty, and shows your commitment to the silicon photovoltaics community. Secure your sponsorship advantages now!

Who will participate?

- Junior and senior researchers and academics from leading institutes and universities
- R&D experts, technologists, and engineers of the major PV companies world-wide
- Industry decision-makers and project developers
- Representatives from companies at every level of the supply chain, providing opportunities to identify new partnerships

About the Conference

The 12th edition of SiliconPV will be held in hybrid format in Konstanz, Germany and online. SiliconPV and nPV will be hosted by the University of Konstanz, the bifiPV Workshop by ISC Konstanz.

SiliconPV will be the key event for sharing and understanding cutting-edge developments and upcoming trends in silicon photovoltaics. It focuses on science and advanced technologies along the value chain of crystalline silicon cells and modules.

As in previous years, SiliconPV will be held in conjunction with the **nPV Workshop** focusing on the next generation of high-efficiency silicon solar cells using n-type substrates. What is new is the cooperation with the **bifiPV Workshop** focusing on bifacial PV technology, including systems and their bankability. This will give participants the chance to visit all three events in only one week.
