[www.npv-workshop.com](http://www.npv-workshop.com)

Over the last >10 years, the SiliconPV Conference has become one of the world's top PV conferences where in-depth new scientific insights and reviews on technological excellence in crystalline Si-based PV technology are presented – and where plenty of space is given for interaction and for building networks.

It is becoming more and more important to enhance the energy transition and develop technologies that will be available for everyone and everywhere, have low cost, and can be manufactured locally. PV is *the technology* to hasten the energy transition and it can be done big, already now, and in the future with much better technologies.

The conference topics cover the value chain from materials up to and including modules and cover aspects such as reliability, sustainability and circularity. Of course the progress made with tandems and multijunction PV devices with silicon bottom cells will have a prominent position in the conference program.

Again, SiliconPV continues the fruitful cooperation with the nPV Workshop on silicon solar cells using n-type substrates – giving the opportunity to have both events in one!

***Sponsorship boosts your firm's visibility, builds loyalty, and shows your commitment to the silicon photovoltaics community. Secure your sponsorship advantages now!***

The conference identity is well established in the PV community and gathers about 350 people from all over the world, mixing students, scientists, technologists, and PV experts from industry. Moreover, the conference is well known as a perfect place to foster innovations in the PV world.

Becoming a sponsor is a great way to highlight your company's presence as an active and important player in the field of silicon photovoltaics. The event offers several sponsorship opportunities helping you to find the most effective way to connect with our attendees and your target group.

***Pick up the most suitable sponsorship package today!***

***We are looking forward to working with you.***

## This is what makes your sponsorship worthwhile:

### You are visible

Your recognition will increase through the conference website and the virtual conference tool

### You are impressive

Show who you are and share your latest research, innovations and services with our participants

### You are on an expansion track

Grow your network by presenting your company to the international world of SiliconPV and nPV

### You are a magnet

Attract ambitious young researchers to your company and develop new partnerships

*Take advantage of new ways of networking and profit from the opportunity to communicate with a global and future-oriented audience.*

## Our participants

Junior and senior researchers and academics from leading institutes and universities

R&D experts, technologists, and engineers of the major PV companies world-wide

Industry decision-makers and project developers

Representatives from companies at every level of the supply chain

## Create your Virtual Sponsor Booth

Sponsors will be offered the opportunity to present their company at a virtual conference booth basically set up like a webpage, but with several possibilities to get in touch with their target group and to network.

*It is up to you. You are free to design and set up your company presentation up to your preferences and ideas!  
Get creative and show who you are!*

By the way, the virtual conference platform will even remain accessible for participants after the conference for a couple of weeks – giving your sponsorship even more attention!

The screenshot displays the 'Virtual Booths' section of the conference platform. A sidebar on the left contains navigation links: Dashboard, Virtual Booths, and Poster Booths. The main content area shows a 'Sample Booth' for 'conexio pse'. The booth layout includes a header with the company name and logo, a main content area with text and images, and a footer with social media links. Callouts highlight various features: 'Upload your company banner or logo and brand the page with your corporate identity' points to the header; 'Provide a description of the scope of your work, ideas, research and commitment' points to the main text; 'Introduce a representative for participants to contact directly' points to a contact box; 'Engage live with conference participants via table networking' points to a table listing; 'Use the chat function to get in touch with conference participants' points to a 'SEND A MESSAGE' button; 'Connect to your social media' points to social media icons; 'Embed a video introducing your company and current projects' points to a video player; 'Add additional logos and banners and link them to your website' points to a section for additional content; and 'Embed further content via iFrame' points to a 'Call for Abstracts' section.

## About the Conference and the Workshop

The 13<sup>th</sup> edition of SiliconPV will be held in hybrid format in Delft, the Netherlands and online. SiliconPV and nPV will be hosted by TNO and TU Delft.

**SiliconPV** will be the key event for sharing and understanding cutting-edge developments and upcoming trends in silicon photovoltaics. It focuses on science and advanced technologies along the value chain of crystalline silicon cells and modules. As in previous years, SiliconPV will be held in conjunction with the **nPV Workshop** focusing on the next generation of high efficiency silicon solar cells using n-type substrates.

### Advantages of a hybrid conference

SiliconPV and nPV Workshop can be either joined online or on-site. The conference will be held in a hybrid format, allowing for online and physical presentations and attendance. This will give you all flexibility so you can attend in any case to connect with the community. Either in person on-site or online.

### SiliconPV Conference from April 11-13, 2023

The conference covers a variety of exciting topics around crystalline silicon for photovoltaic application, which is still the leading technology for solar electricity generation.

### nPV Workshop from April 13-14, 2023

As in the last years, we will continue our fruitful cooperation with the nPV Workshop. Taking place directly after the SiliconPV conference with one overlapping day, the workshop provides a complete overview of all trends, innovations and developments of n-type technology.
